Dear Mr. H.U. Talawar, dear Ms G. Rasbmi,

Thank you very much for the time you and your team have given us to discuss "The Future of Work in ICT". It was a great pleasure getting to know all of you in India and an excellent opportunity to learn about the Indian situation from you.

We would like to cordially invite you to take part in a validation discussion around October-November 2018, once Nicola has compiled a first draft of the research study covering not only India, but also Indonesia and Thailand. The aim of a validation discussion is to verify and compare the results gained in each one of the project countries. This is to ensure that you gain first-hand access to the research outcomes and that your voice as a crucial part of the Indian ICT sector is reflected appropriately.

Please do not hesitate to contact me in case of any questions or pursuing issues you would like to discuss with us.

Thank you for your kind cooperation.

Best regards,
Hitomi
